

Medicine has been associated with man since time immemorial. From Hippocrates and Apollo, the pioneers of this science, medicine has come a long way. From astute observations and clinical experiences to the diagnostic and therapeutic prowess of machines, many milestones in healthcare have been achieved. The gift of life has been given to many, right from infants to the aged. This noble profession always strives for just one cause – life without disability and pain, and of course, 'Life' itself.

A JOB ORIENTED COURSE

The University

Padmashree Dr. D. Y. Patil University is one of the leading private Universities in Maharashtra and it has earned a significant position among the Health Universities in India within a short span of its existence. Situated in the serene and peaceful surrounding at Nerul, Navi Mumbai with a sprawling campus of 72 acres of land, this University houses in its ambit some of the leading institutes of higher learning and has a culture of commitment, transparency and teamwork. As on today we have large Medical, Dental, Ayurved and Nursing Colleges and Departments of Biotechnology & Bioinformatics, Business Management, Education, Physiotherapy and Hospitality & Tourism Studies.

Hospital - Compassion. Care. Cure

The 1050 bedded super specialty Dr. D.Y. Patil Hospital & Research Centre at Nerul, Navi Mumbai is attached to Medical College of the University and has top of the line facilities in all departments. Being a charitable hospital, it believes that a life in peril has to be saved and no one who approaches the Dr. D.Y.Patil Hospital and Research Centre shall ever be turned away. It sees the importance of treating the ill with compassion and recognizes the duty of understanding the patient's problems and caring for them. It has the dedication and desire to see each and every person leave the hospital cured. It is the hospital's commitment to mankind.

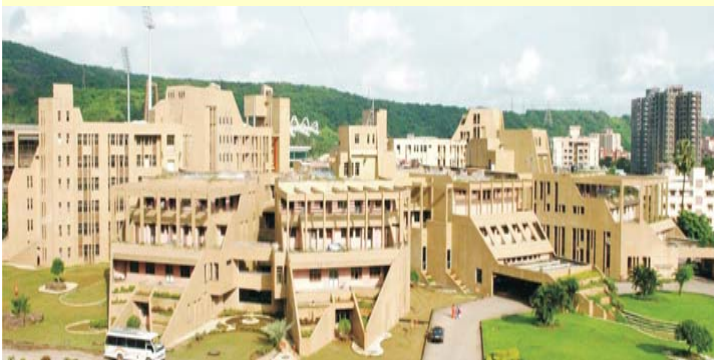

About Physician Assistant

Physician Assistants (PAs) are healthcare professionals licensed (or when employed by the federal government, credentialed) to practice medicine with physician supervision. As part of their comprehensive responsibilities, they conduct physical exams, diagnose and treat illnesses, order and interpret tests, counsel on preventive health care, **assist in surgery**, and write prescriptions on behalf of the Physician. Within the Physician-PA relationship, physician assistants exercise autonomy in medical decision making and provide a broad range of diagnostic and therapeutic services. A PA's practice may also include education, research, and administrative services. PAs increase patient access to primary care, promote cost savings, and improve practice efficiency and productivity.

Objective of the Programme

Upon completion of the Program, the student will be able to:

- Demonstrate the application of current, evidence-based medical knowledge to provide the most appropriate patient-centred care (Medical Knowledge).
- Communicate effectively with patients, physicians, and other members of the healthcare team to foster interdisciplinary collaboration (Communication).
- Demonstrate patient-centred care that is effective, timely, efficient, and equitable for the treatment of health problems and promotes wellness across the lifespan, regardless of individual characteristics (Systems-Based Patient Care).
- Model the use of bioethical and legal principles pertaining to the delivery of healthcare (Professionalism).
- Positively impact and advocate for the appropriate provision of healthcare for patients, their families, and communities (Professionalism).
- Exemplify a commitment to personal growth and development as well as growth and development of the physician assistant profession (Professionalism).
- Demonstrate scholarship and commitment to lifelong learning through critical analysis, interpretation, and evaluation of current medical research and literature to enhance the delivery of health care (Practice-Based Learning and Improvement).
