## **About Griffith University**

Griffith University is a leading Australian university, ranked in the top 4% of universities worldwide (Times HESQS World Ranking). With a blend of innovative and traditional disciplines addressing global issues and challenges, studying at Griffith is the ideal environment to inspire learning and discovery, and with access to first class facilities it is the perfect place to begin a rewarding career.

Griffith University is one of Australia's most innovative and dynamic, government-funded universities, located in the nation's fastest growth region, the Brisbane-Gold Coast corridor. It is home to over 38,000 students, with over 9,000 students from 125 countries.

As a pioneer in fostering relations between Australia and India, through cricket and education, Griffith University will deliver a world class program in Exercise Science. It has become the university of choice of many of the nation's top athletes who are looked after in the Griffith Sports College. Through this college Griffith has forged links with the international, national and local sports communities and as a result of these linkages greater opportunities exist for young men and women who are passionate about sport and want a sports related career.

The Griffith University Health group is one of the fastest growing faculties in the country. It's Dental School was established in 2004 being the first new dental school in Australia for 60 years. The medical school opened in 2005, preparing graduates for a broader area of health professions than most other universities, leading the way in diverse areas which include: environmental health, exercise science, human services and nursing, nutrition, pharmacy, physiotherapy, psychology, social work and health. The Queensland government has now released funding to build a new teaching hospital on the Gold Coast campus.
